REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The feature of one of the rotor portions including a changing mechanism for changing the axial position of one of the rotor portions relative to the axial position of the other rotor portion in accordance with the magnetic action force produced between the field magnets of the two rotor portions and a direction of torque induced on the split rotor, in combination with the other limitations present, are neither disclosed nor taught by the prior art of record.

Re claims 20, 21/20, 22/21/20, 23/20, 24/20, 25/20 and 26/20, the feature of the first and second field magnets being provided opposite to magnetic poles of the stator and having a mechanism for changing the phase of the compound magnetic poles of the first and second field magnets relative to that of magnetic poles of the first field magnet in accordance with the direction of torque of the rotor, the mechanism for changing the phase in accordance with the direction of torque having means for truing up the magnetic pole center of the first field magnet and another magnetic pole center of the second field magnet on a basis of balance between the direction of torque generated in the rotor and magnetic action force between the first and second field magnets, and means for shifting the magnetic pole centers of the first and second field magnets whenever the direction of torque generated in the rotor is inverted, in combination with the other limitations present, are neither disclosed nor taught by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
